

## Compost occupation

# Experiment passport

### Section 1: Introduction

Give some background knowledge about composting in general	
Explain what you're testing	
Include research	
List the variables: independent, dependent, controlled, and uncontrolled	
Explain the use for your results, AKA purpose	

### Section 2: Hypothesis

State what you expect the results to be	
State how many times you'll repeat the experiment	

### Section 3: Materials list

A bulleted list of all the materials needed to reproduce the experiment (include quantities)	
If helpful, a diagram could be included	

### Section 4: Method

A step-by-step list of instructions needed to reproduce the experiment (either in paragraphs or in a numbered list)	
---	--

### Section 5: Results

Results are communicated in full detail	
---	--

### Section 6: Conclusion

A sensible, informative conclusion is stated	
Unforeseen factors are considered	

**Clear communication**

Write in third person, past tense	
Use full sentences (expect in the materials list)	
Use correct spelling	
Diagrams, if any, are neat	

**Layout**

Choose sensible fonts; one for headings and one for text	
Separate sections with one line
